### Anesthesia PCA Order Sheet - Morphine

**Memorial Hospital**

**Date:**

**Time Ordered:**

**Patient Type:** (Choose one) □ Inpatient □ Observation

1. No additional sedatives/supplements (except acetaminophen) to be given during PCA unless discussed with Anesthesia Service (#0882).

2. Patient weight = kg

3. Allergies

4. Morphine sulfate = mg/cc

5. Mode (choose one, cross out others):
   - a. PCA
   - b. Continuous
   - c. PCA + Continuous (PCA Plus)

6. Continuous infusion = mg/hr (0.01 - 0.02 mg/kg/hr) for PCA Plus only

**Physician’s Orders**

**Date:**

**Time Ordered:**

**Patient Type:** (Choose one) □ Inpatient □ Observation

7. PCA dose = mg (0.01 - 0.02 mg/kg)

8. Lockout = minute (7 - 15 minutes)

9. Target limit = mg (0.36 - 0.40 mg/kg)

10. Cardiorespiratory monitor Yes/No

11. Continuous Pulse Oximetry Yes/No

12. Ambu bag, O₂ tubing, face mask and suction at bedside Yes/No

13. 1 ampule naloxone (narcotic) with 1 ml syringe at bedside Yes/No

14. Assist pain relief, sedation and vital signs per PCA routine.

**Drugs**

**Date:**

**Time Ordered:**

**Patient Type:** (Choose one) □ Inpatient □ Observation

15. If respiratory rate < 12, SpO₂ < 92%, and/or the patient is uncomfortable, stop PCA, STAT page Anesthesia Service (#0882), and apply supplemental O₂.

16. For itching, administer benadryl (0.1 - 0.25 mg/kg) = mg (max. 25 mg) IV over 20 min. q 4 hrs pm. Hold if patient is somnolent.

17. For nausea/vomiting, administer 0.043 mg/kg = mg (average: 0.5 mg) IV over 20 min. or by supplementary doses q 4 hrs pm. Hold if patient is somnolent.

18. Contact Anesthesia Service (#0882) for inadequate analgesia, questions and to evaluate PCA decompensation.
